

www.artofokami.com

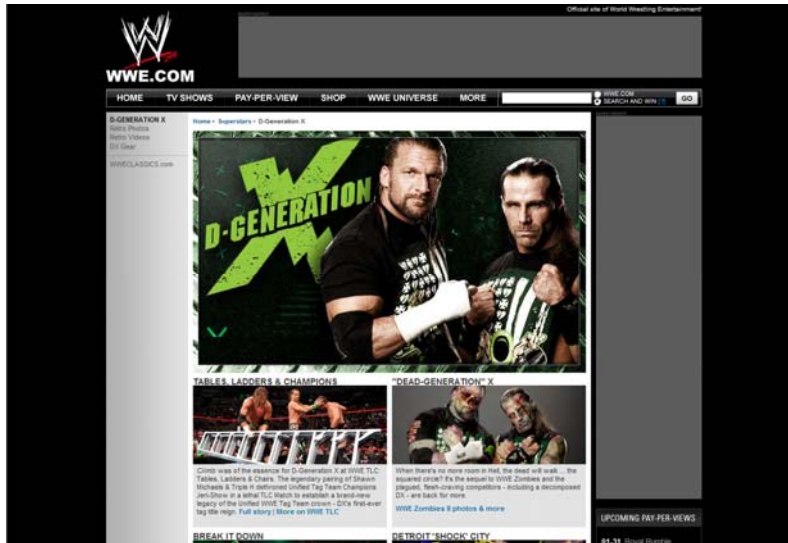

This website shows art of Okami and it has fantastic art style galleries, wallpapers and fan art. I like the design because it has amazing bright colours and it very eye-catching. Navigation is clear around the website and easy to read and use. The website is aimed at a target audience of over 12 because Okami was an action video game with some fighting which may frighten under 12 years (PlayStation 2). It shows professional art style.

www.dragonquest8.com

This website shows video game from PlayStation 2. Design is incredible image because it has bold colours and simple art of anime. Navigation is great and easy to use. I think the target audience is over 8 because it shows people, colours and cartoon of anime.

<http://dx.wwe.com>

This website shows two superstar men named Triple H and Shawn Michael and they are a tag team called D-Generation X (DX). DX come from World Wrestling Entertainment (WWE). I think the colours are not bad but DX logo used bold green colour to make eye-catching. Navigation has lots to click to other links for example different superstar and what's on WWE. The target audience I think over 12 because it has strong language and wrestling video clips.

www.peterrabbit.com

Peter Rabbit is children stories by Beatrix Potter. This design shows brilliant art style and clear colours. Also it includes play fun and games because it is for the children. Navigation is easy to find and clear font. The target audience is over 3 because it is children's stories and adults can buy books from the website for children.

www.tomandjerryonline.com

I like the design because it has very simple colours but the font is too small. Navigation has lots of different links from the right side of the screen. I think the target audience is over 3 because Tom and Jerry was a funny cartoon for children and adults.
